SENIOR BACKEND ENGINEER AT GET YOUR GUIDE - SEARCH AND RECOMMENDATIONS

Summary

My goal is to create and maintain software that does some good in the world with high quality and timely delivery. To have a nice time learning and sharing while working with amazing people. I care about humanism and science.

Main skills

Software Architect

To build systems with the balance between design and pragmatism that allows reasonable delivery dates with long-term sustainability.

Team Leader

Teams are bigger than individuals. I conscientiously look for ways to empower, support and inspire people around me.

Teacher

I am passionate about technology and science and I share it.
